Dr. Chernov,

I was breaking out on the lips and chin at least twice a month. It was a really bad case, and I guess my immune system wasn't dealing with it well.

But The Doctor's Cold Sore Solution has stopped all outbreaks for me. The tingling warning signs are happening less and less often, because when they do, I rub on a drop or two of your solution. At first, I would rub it on every couple hours, per your instructions. But now, just one time does the trick. Perhaps your solution has weakened the virus, or perhaps it just knows what's coming, and retreats to hide again.

Either way, I have had no outbreaks, except for when I was on a trip, and had forgotten to take your solution along.

Thank you so much for doing the research to help people like me. I had tried all kinds of other "cures" and nothing had any effect at all.

Bless you,

Don Be [REDACTED]
